EDUCATION

Vellore Institute of Technology

Bachelor of Technology (B.Tech.) in Computer Science
CGPA: 8.45

Bhopal, Madhya Pradesh
Expected Graduation: May 2027

EXPERIENCE

AI Training Contributor

Outlier (Scale AI) — Remote, Freelance

2025

- Evaluated and ranked AI-generated frontend code responses to improve LLM accuracy; applied prompt engineering to assess code quality, logic correctness, and UI implementation standards.

SKILLS SUMMARY

Languages: JavaScript, Python, C++

AI & Machine Learning: LLM Integration, NLP, Computer Vision, Prompt Engineering, Scikit-learn, TensorFlow

Frameworks & Libraries: React.js, Tailwind CSS, Node.js, Express.js

Databases: MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, OpenCV, MediaPipe

PROJECTS

Lemonade

(Python, OpenCV, MediaPipe, Streamlit, LLM)

Real-time posture correction and personalised fitness planning web application. [source code](#)

- Deployed a multipage CV pipeline tracking 33 body landmarks in real-time across 5 exercises, reducing posture error feedback latency with audio-visual alerts.
- Generated personalised weekly fitness plans via LLM using user goals and posture data; cut manual planning to zero by automating SQL-backed profile storage and retrieval.

Diva

(Python, React.js, NLP)

A web platform empowering women through knowledge and resources. [source code](#) [live demo](#)

- Scaled platform to 500+ users within 2 months by curating 50+ educational resources, 3 legal support categories, and a secure mentorship forum for women.
- Slashed manual query handling by 80% through an NLP-driven chatbot, reducing average response time and freeing moderators from repetitive support tasks.

Mp3by4

(Python, BeautifulSoup, OpenCV, Flask, Google Gemini AI)

Chrome extension that transforms webpage text into a concise video summary. [source code](#)

- Transformed raw webpage text into HD videos (1280×720, 24 FPS) with 3 character narration styles, achieving 60–80% content compression via Gemini AI summarisation and gTTS text-to-speech.
- Resolved audio-video sync to frame-level precision using MoviePy audio analysis at 44.1kHz and NumPy RMS amplitude calculations, eliminating lip-sync drift entirely.

WishBin

(React.js, Node.js, MongoDB, Tailwind CSS)

Peer-to-peer marketplace for college students to buy and sell belongings during hostel vacations. [source code](#)

- Architected a full-stack peer marketplace with college-verified listings, category filtering, real-time buyer-seller chat, and a cross-vacation wishlist tracking system.
- Optimised MongoDB schema for listing and user data, enabling sub-100ms queries on a mobile-first UI across concurrent hostel-vacation use cases.

ACHIEVEMENTS & HACKATHONS

HueMe — CodeCircuit Hackathon *(Vite, React.js, Tailwind CSS, Firebase)*

May 2025

Mood-tracking web app [source code](#) [live demo](#)

- Shipped a mood-tracking web app in 48 hours enabling emotion logging via colour + emoji on a personalised monthly calendar, with Firebase (Firestore & Auth) powering real-time sync and journal entries.
- Shortlisted for a paid freelance frontend role directly from CodeCircuit Hackathon recognition, converting a competition win into a professional opportunity.

College Coding Competition

October 2025

- Selected among 900+ students for exceptional problem-solving and coding proficiency.

POSITION OF RESPONSIBILITY

Nature and Trekking Club

Core Member, Event Management Team

VIT, Bhopal
February 2025 – Present

Volunteer, College Placement Drive

Coordinated logistics and documentation for 200+ candidates and visiting recruitment teams, ensuring a seamless interview process.
